

ShimiColours

Shimicoat Popular Colours

Vibrant & Inspiring

Shimicoat Standard Colours known as ShimiColours come in a range of Tint and Colours with Metallic effect suitable for both Acrylic, Urethane and Epoxy based resins. There are two categories of ShimiColours:

1. ShimiColours L
2. ShimiColours M

ShimiColour L is liquid colour pack suitable for Acrylic, Urethane and Epoxy based resin products such as ShimiSeal and ShimiPoxy.

ShimiColour L are liquid pigments coming in 250mL tin containers, with easy pour lid, so you can dispense small quantities to suit the desired colour effect.

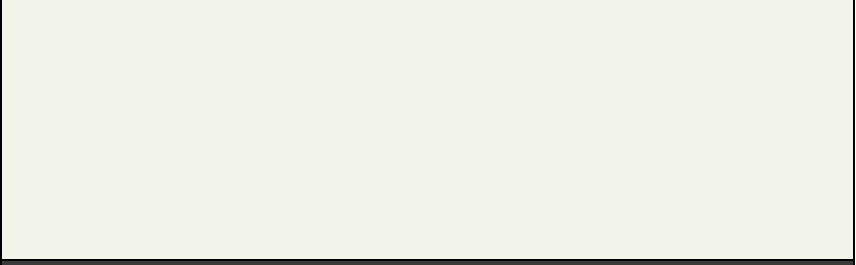

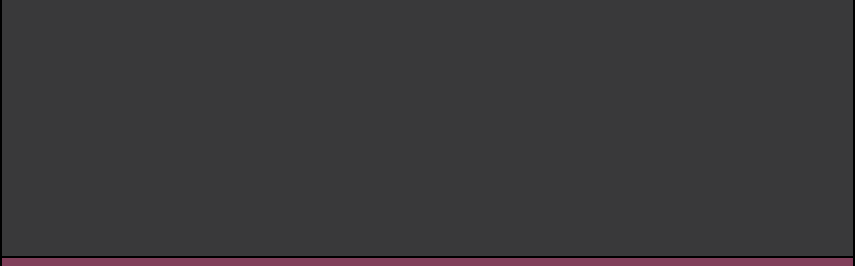

They have an advanced resistance to fading than conventional dyes and colouring agents, and are water-resistant. Such a high degree of light-fastness over such a range of fully intermixable colours makes them ideal for use many floor types.

ShimiColour L are designed for solvent, Acrylic or solids-based epoxy systems, such as ShimiSeal, ShimiPoxy and other solvent based resin products.

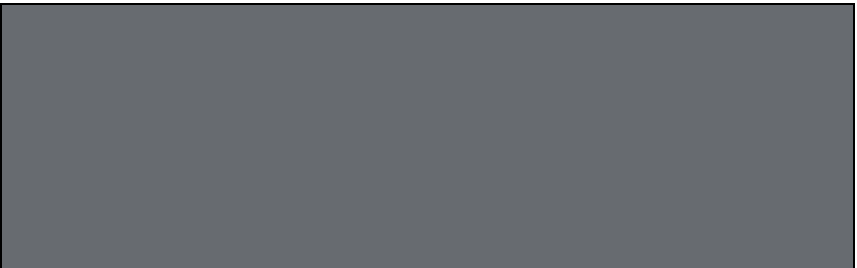

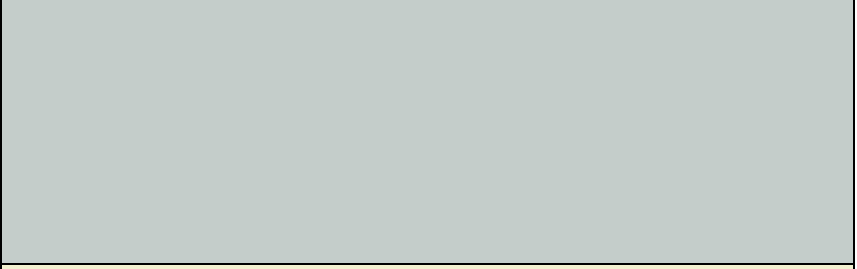

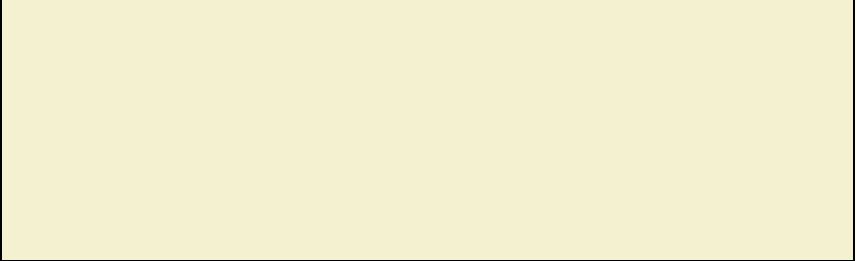

ShimiColour L are 75% solids and formulated to blend consistently and thoroughly with Epoxy and Acrylic based products.

ShimiColours M is Powder Metallic colour pack suitable for both Acrylic and Epoxy based resin products such as ShimiSeal and ShimiPoxy. ShimiColour M creates pearlescent features, Swirl Coats and Marble Coats in decorative flooring systems.

You will only require a very small amount (as low as 1 part per 100) to transform clear resin into vibrant colours. Higher concentrations may be required for some floor to achieve better coverage.

No	Aus Std Ref	SHIMI CODES	Representative Colours
1	B12 Royal blue	Royal Blue	
2	G27 Homebush green	Homebush Green	
3	N14 White	White
